PRODUCT DESCRIPTION:

Self-adhering blue alkaline resisting mesh tape incorporates an extra strength adhesive on one side for easy use as a supplement in plaster systems to help prevent cracking, reinforce corners, or provide a back for ornamental plaster.

USES:

Use for crack overly in the repair of fine and sporadic faults in gypsum or lime plaster, or cement or lime stucco/renders. Ideal for use with Ecologic™ Plaster TAKCOAT™ or TOP-COAT™ systems to permanently hide joints, cracks, holes, and/or unify surfaces without the need to embedded into mortar or plaster.

For spanning over wider areas, consider using Ecologic™ Brand Fiberglass Mesh Tape available in 6" width or self-adhering Ecologic™ Brand Fiberglass Mesh Roll in 18" width.

For covering whole walls when embedding into an Ecologic™ Brand Lime Plaster System, use non-adhesive Ecologic™ Brand Fiberglass Mesh Roll available in 9.5" and 38" widths.
