### SECTION 6 - ACCIDENTAL RELEASE MEASURES

<b>Personal Precautions:</b>	Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. Remove all ignition sources. Remove or isolate flammable and combustible materials. All persons dealing with clean-up should wear the appropriate protective equipment (See section 8).
<b>Environmental Precautions:</b>	Confine spill, preventing it from entering sewer lines or waterways. Dispose of as per local, state, and federal regulations
<b>Spill Response / Cleanup:</b>	Ventilate area of release. Stop the leak if it can be done safely. Contain and absorb any spilled liquid concentrate (if applicable) with inert absorbent material, then place material into a container for later disposal (see Section 13). Contaminated absorbent material may pose the same hazards as the spilled product Notify the appropriate authorities as required.

### SECTION 7 – HANDLING AND STORAGE

<b>Safe Handling Procedures:</b>	Before handling, it is very important that engineering controls are operating, and that protective equipment requirements, and personal hygiene measures are being followed. People working with this chemical should be properly trained regarding its hazards and its safe use. Handling equipment should be properly grounded. Inspect containers for leaks before handling. Label containers appropriately. Ensure proper ventilation. Avoid breathing dusts. Avoid contact with eyes, skin, and clothing. Avoid generating high concentrations of dusts. Keep away from incompatible materials such as strong oxidizing materials. Keep containers closed when not in use.
<b>Storage Requirements:</b>	Store in a cool, dry, well-ventilated area out of direct sunlight. Store away from incompatible materials. Inspect all incoming containers to make sure they are properly labeled and not damaged. Storage area should be clearly identified, clear of obstruction, and accessible only to trained personnel. Inspect periodically for damage or leaks.
<b>Incompatible Materials:</b>	STRONG OXIDIZING MATERIALS, strong acids, some metals.

\* Respirable fraction.  
 \*\* Crystalline silica is expected to be below 1%, but concentrations may vary with source material  
 † The OSHA Permissible Exposure Limit (PEL) for Silicon Dioxide (SiO<sub>2</sub>) is dependent upon the percentage of free silica in the dust and is calculated by a formula given.

<b>Engineering Controls:</b>	Use under well-ventilated conditions. Local exhaust ventilation system is recommended to maintain concentrations of contaminants below exposure limits.
<b>Respiratory Protection:</b>	Respiratory protection is required if the concentrations are higher than the exposure limits. Use a NIOSH approved respirator if the exposure limits are unknown.
<b>Protective Clothing/Equipment:</b>	Chemically protective gloves (impervious), and other protective clothing to prevent prolonged or repeated skin contact, must be worn during all handling operations. Wear protective chemical splash goggles to prevent mist and dust from entering the eyes. Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.
<b>General Hygiene Considerations:</b>	Avoid generating high concentrations of dusts. Avoid contact with skin and eyes. Avoid breathing dusts or mists. Never eat, drink, or smoke in work areas. Practice good personal hygiene after using this material. Remove and wash contaminated work clothing before re-use.
