**SAMPLE SIZE GUIDE**

**SHIPPING RECOMMENDATIONS**

To ensure that your sample arrives undamaged, please place secured in a properly padded package. Do not send samples in letter envelopes, as these tend to result in pulverized, shredded, or lost samples.

For quicker transport and processing, consider sending your sample through FedEx or UPS with tracking.

Free Observations are evaluated in first-come, first-serve order. Response times may be extended during busy periods. Generally, clients who select "Email" as their preferred contact method will receive results sooner.

**LW LW USE ONLY**
